

2-D Fourto Game Pieces in B & W

Print these pieces on cardstock and cut them out. Be careful to cut on the outside of the outline of each piece as the border style (solid or dotted) are one of the attributes of the pieces. Use the Printable Fourto Gameboard to play this game. These pieces have only 3 attributes. If you want a set with all four attributes, print two sets on different colored paper and then use the top two rows in one color to go with the bottoms two rows in the other color. In this way, color will be your fourth attribute.
