

Earth's Rotation Hokey Pokey

By Kate Yablonski

You put your front in, you put your front out.

You put your front in and shake it all about.

When you face the sun, it's daytime now.

That's what it's all about!

You put your back in, you put your back out.

You put your back in and shake it all about.

When you face away, it's nighttime now.

That's what it's all about!

You put your whole self in, you put your whole self out.

You put your whole self in and you shake it all about.

You rotate around on your axis now.

That's what it's all about !
